

BASE DIMENSIONS:

THE FOLLOWING DIMENSIONS ARE THE EXACT EXTERNAL BASE DIMENSIONS FOR THE AGL, Eden, AND PEAK RANGE (pto).

All sizes are the external measurements of the metal base, or the external brick measurements where no metal base is used.

THE FOLLOWING OPTIONAL BASES ARE 30mm IN THICKNESS.

If doing a brick base (i.e. not using a metal base) please use a solid brick with no frogs or holes.

Give yourself enough room around your base to allow you to anchor the base into the ground.

IMPORTANT: Do not anchor your greenhouse down until it is fully assembled including glazing unless you are 100% sure your base is square and level. If not your glass will not fit properly.

OVERLAPPING CILLS DEMONSTRATES THE NEED FOR ACCURACY WHEN BUILDING BRICK BASES.
